

Sometimes your lender will suggest a consultant/inspector for you or even give you the impression that you have to go with their consultants/inspectors in order to get your loan approved. THIS IS NOT TRUE! You are paying for it and you can get a qualified consultant/inspector on your own. Keep in mind, some lenders get kickbacks from consultants which causes you to overpay for their services.

Give us a call! Potts Construction only uses one company for inspection and consultant services and we receive **no kickbacks and they are not affiliated with our company**. We do this to employ a team system with respect to how we do things. We work seamlessly with the consultant/inspector so that we can get your paperwork processed as quickly and inexpensively as possible.

Between us and our consultant/inspection team, we will guide you through the entire process from the time of your initial inspection until we have completed all of the repairs.
